

Project Development Phase Model Performance Test

Date	29June2026
Project Name	Network Request Management System

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Values	Screenshot
1	System Summary	ServiceNow-based Network Request Approval Automation using Service Catalog, Flow Designer, Manager Approval, Email Notifications, and Network Database Table. Requests are automatically created, routed for approval, and updated after approval or rejection.	 A screenshot of the ServiceNow 'Table - New Record' configuration page. The page shows fields for 'Label' (Network Database), 'Name' (u_network_database), and 'Extends table'. On the right, there are options for 'Application' (Leave Management System), 'Create module' (checked), 'Add module to menu' (Create new), 'New menu name' (Network Database), and 'Remote Table' (unchecked). Below these are tabs for 'Columns', 'Controls', and 'Application Access'. A 'Table Columns' section is visible with a search bar and a table header for 'Dictionary Entries'.
2	Workflow Execution Accuracy	Request Creation Success Rate: 100% Approval Workflow Success Rate: 100% Email Notification Delivery: Successful Request Status Update: Successful	 A screenshot of the ServiceNow 'Catalog Item - Network Request' configuration page. The page shows a list of 'Assigned Topics' with columns for 'Type', 'Question', and 'Order'. The list includes items like 'Container Start', 'Multiple Choice', 'Single Line Text', and 'Container End'. A tooltip is visible over one of the 'Single Line Text' items, stating: 'If this is a relocation, please provide your relocated address here'.
