

Project Planning Phase

Project Planning Template (Product Backlog, Sprint Planning, Stories, Story points)

Date	29 June 2026
Project Name	Automated Network Request Management
Maximum Marks	5 Marks

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task
Sprint-1	Network Request Submission	USN-1	As an employee, I can submit a network request through the Service Catalog by entering the required details.
Sprint-1	Network Request Submission	USN-2	As an employee, I can attach all necessary request details so that the IT team receives complete information.
Sprint-1	Network Request Management	USN-3	As the system, I automatically create a network request record in the Network Database Table after submission.
Sprint-1	Approval Workflow	USN-4	As a manager, I receive a notification to approve or reject the submitted network request.
Sprint-2	Approval Workflow	USN-5	As a manager, I can approve or reject the network request directly from ServiceNow.

Project Tracker, Velocity & Burndown Chart: (4 Marks)

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)
Sprint-1	20	6 Days	01 Jul 2026	06 Jul 2026	20
Sprint-2	20	6 Days	07 Jul 2026	12 Jul 2026	20
Sprint-3	20	6 Days	13 Jul 2026	18 Jul 2026	20
Sprint-4	20	6 Days	19 Jul 2026	24 Jul 2026	20

Velocity:

Imagine we have a 10-day sprint duration, and the velocity of the team is 20 (points per sprint). Let's calculate the team's average velocity (AV) per iteration unit (story points per day)

$$AV = \frac{\text{sprint duration}}{\text{velocity}} = \frac{20}{10} = 2$$

Burndown Chart:

A burn down chart is a graphical representation of work left to do versus time. It is often used in agile software development methodologies such as Scrum. However, burn down charts can be applied to any project containing measurable progress over time.
